

Project Development Phase Model Performance Test

Date	17 November 2022
Team ID	PNT2022TMID2089
Project Name	Skill/Job Recommender
Maximum Marks	10 Marks

Model Performance Testing:

S.No.	Parameter	Values	Screenshot
1.	Model Summary	<p>The Chabot is used by the user to interact and select queries that are populated based on the questions of the customers. There can be multiple instances of a single Chabot inquiring different user at the same time. It quickly responds with expected answers to frequently asked customer queries. It can be scaled as per the skills provided by the end users.</p>	

2.	Accuracy	Training Accuracy – 100% Validation Accuracy – 100%	 <p>The screenshot displays a dashboard for an AI assistant's performance. At the top, three summary cards show 'Unique users' (26), 'Conversations' (59), and 'Requests' (64), each with a small line chart. Below these, a tabbed interface has 'Recognition' selected. The main section is titled 'How often are requests recognized by your assistant?' and includes a 'Daily' filter and a percentage icon. It features a line chart showing 'Average recognition' at 100% across four dates: 13 Nov, 15 Nov, 16 Nov, and 17 Nov. A large '100%' is also displayed on the left side of the chart area.</p>
